HepA: protects against hepatitis A

For more information, call toll free 1-800-CDC-INFO (1-800-232-4636)

or visit www.cdc.gov/vaccines

NOTE: If your children miss a shot, you don't need to start over, just go back to your doctor for the next shot.
The doctor will help you keep your children up-to-date on his or her vaccinations.

- * This is the age range in which this vaccine should be given.
- ** Influenza is a seasonal vaccine. All children between the ages of 6 and 59 months should receive vaccination during the influenza season each year. If this is the first time for flu vaccine, a child should receive two doses, separated by at least 4 weeks. If a child only receives one dose in the first season, he/she should receive two doses the next season.

Adapted from the Immunization Action Coalition Immunization for Babies Immunization Schedule and the 2007 Recommended Immunization Schedule for Persons Aged 0-6 years approved by: Advisory Committee on Immunization Practices, American Academy of Pediatrics, and American Academy of Family Physicians.
